

**WISCONSIN ENLISTS 1000  
MEN FOR THE NAVY**

**WISCONSIN ENLISTS 1000  
MEN FOR THE NAVY**

Albert Schultz of Wausau, has the honor of completing the first 1000 young men enlisted from Wisconsin and upper Michigan.

While Milwaukee continued to lead all other cities in the state in recruiting last week, the state at large contributed more than two-thirds of the forty men who joined the navy.

Wausau with seven enlisted men stands first after Milwaukee. Oshkosh scored six men, Ishpeming, Mich., five, Madison and Eau Claire two each and LaCrosse and Ashland one each.

The high standards for enlistment are being maintained, as the large percentage of rejections show. A young man must be perfect before he can get into the navy. Any young man who is accepted for naval service has the honor of being stamped "100 per cent Physically Perfect" by Uncle Sam.

Seventy men applied at LaCrosse but only seven were taken. Ishpeming, Mich., had twenty applicants but only five were accepted. Only six out of fourteen applicants were accepted at Oshkosh.

On July 1 the age limit for the navy was raised to 18 years. Formerly a boy of 17 could enlist, but the Navy Department has seen fit to put the minimum age at 18.

Certain branches of the naval service are all ready filled. Orders have been received at the navy recruiting office, 222 Grand avenue, Milwaukee, not to enlist any more yeomen or electricians. As the various ranks are filled up, each new applicant will have less choice of which branch he accepts. If any young man is planning to enlist, the sooner he does the better his chances will be.

For France.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 250 million to 450 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion.

# WHITTET EDUCATION BOARD BILL WINS

LOWER HOUSE CONCURS IN SPEAKER'S MEASURE BY VOTE OF 57 TO 23.

## PRES. VAN HISE IS EXCLUDED

Act Provides for State Board of Nine Members, Five to Be Appointed by Governor, One to Be a Woman.

Madison—The Whittet central board of education bill was introduced in the assembly, 57 to 23, just as it passed the senate, and will be messaged immediately to the governor so that the five appointments can be made to the legislature. The bill as introduced is in the form of the Staudenmeyer substitute.

The bill provides for a state board of education of nine members, five of whom shall be appointed by the governor for terms ranging from one to five years. One of the five appointments must be a woman. The other members must be confirmed by the senate. The other members are the governor, state superintendent of public instruction and one representative of the normal and one representative of the university regents.

By provision it is impossible for President Van Hise to be a member. The secretary of state will be a member until the expiration of his present term. The board's present powers are curtailed. The board will pass upon educational budgets of the university and normal schools and the capital accounts of these institutions. The appropriations by the legislature go direct to the separate institutions and the separate board of regents. The bill has the support of President Van Hise and Gov. Philipp.

Debate on the school bill was opened by Carl Hansen, who opposed the measure. He read statistics indicating that a rigid supervision of university finances was needed. Whittet maintained that the central board should have the power to make the budget and pass on capital and recommendations.

The assembly passed the bill appropriating \$37,200 for the biennial period and authorizing the university to conduct investigation work in stump pulping in northern Wisconsin. The bill now goes to the governor.

## GOV. VETOES FREE PASS BILL

Says Railroad Transportation Privilege Proposed for Editors Violates Constitution.

Madison—Gov. Philipp has vetoed the Burnett bill, permitting railroad transportation for advertising space in daily and weekly newspapers. He vetoed the bill because he considered it unconstitutional and against good public policy. The bill sought to permit a railroad company to exchange advertising space for a free passage in its passenger cars. The bill was introduced by Rep. Burnett, who said it was a weekly or daily newspaper, and the members of his family and dependents, could ride for transportation on him, could ride for advertising space in his newspaper.

The transportation was for the editor and members of his family dependent upon him. In his veto, the governor reviewed at considerable length the long contest waged in Wisconsin over railroad freight and passenger rates, and for the passage of a law prohibiting the exchange of advertising space for free passage.

The governor said that the enactment of the Burnett bill would permit railroads to discriminate in their passenger rates, which would be intolerable to the general public, which would have to pay for its transportation in cash, while the editor of a weekly or daily newspaper, and the members of his family and dependents, could ride for transportation on him, could ride for advertising space in his newspaper.

Gun Discharge Causes Death. Oshkosh—The body of Charles Curry Chase, one of the leading manufacturers and business men of this city, was found in the basement of his home. Near the body was a shot gun cleaning rod while his favorite gun was securely fastened in a vise at which he had been accustomed to clean the weapon. Death was caused by a wound in the left breast discharging the result of an accidental discharge of the gun.

Assemblyman's Daughter Weds. Fond du Lac—Miss Augusta Pickart, daughter of former Assemblyman Chris. Pickart, was married here to William F. Phelan.

Archbishop Orders to Ordain. Oconomowoc—Ordination ceremonies will be held at the Lac La Perte, Oconomowoc, on June 22 and 23, Archbishop Messersmith of Milwaukee conferring the holy orders.

May Draft 700 at Fond du Lac. Fond du Lac—Including the national guard and regular 700 men will be drafted in this county on the first call, according to H. E. Swett, chairman of the county defense council.

Wife Slayer Takes Own Life. Frederic—The body of Oscar Dunn, who in a jealous rage shot and killed his wife at their home near here, was found in a clump of bushes not far from the house with a bullet wound in the temple.

State Capitol Dedication Delayed. Madison—There will be no dedication of Wisconsin's new \$6,000,000 state capitol this year. Senator Timothy Burke of Green Bay withdrew the resolution from consideration.

Gets Prof. Board Post. Madison—Prof. Ralph H. Hise of the University of Wisconsin, has left for Washington, D. C., to report for staff duty on the general munitions board.

Jokes Lead to Suicide. Fond du Lac—After being "kidded" for several days over the fact that he registered for army service, Matthew Holstein, 24 years old, suicided by hanging in the town of Forest.

## DRAFT MAY MISS 5 COUNTIES

Adj. Gen. Holway Polls State to Determine Number of Men to Be Called Out.

Madison—When President Wilson proclaims the first draft to fill the regular army and the national guard, he will find according to Adj. Gen. Orlando Holway, who has just completed a poll of the state by counties to determine how many men each county will have to furnish.

Under the draft act the quota for each state is determined according to the population and credit is to be given for the number of men who were in military service in the guard on April 1, or who have entered the guard or the regular army since that date. Holway's toll does not include the men who have enlisted in the regular army since April 1. He is still seeking this information.

According to Gen. Holway's figures the following counties will be exempt from the first draft: Ashland, Forest, Groen, Poplin and Sawyer. The first draft is proposed to bring the strength of the army and the guard to 750,000. Wisconsin's nation guard strength, when completed by regard strength, will be 21,500 men, part of which will offset the first draft to fill the army and will also be a part of the second draft of 500,000. The second draft will bring Wisconsin's second draft to 32,000. Add to Wisconsin's 21,500 guardsmen 2,500 men enlisted in the regular army since April 1, and Wisconsin will have to furnish only about 8,000 men under the second draft.

Gen. Holway, however, is urging enlistment in the guard or regular army continually in the hope that when the second draft comes Wisconsin will already have completed its quota of 32,500. A campaign to enlist 2,000 men has been started in forty-five counties in Wisconsin, and the date set for the completion of this work is July 1. If the goal is reached, 160 men must volunteer for service every twenty-four hours, or four to a county.

1937 GRADUATE AT MADISON Annual Commencement Exercises of University of Wisconsin Held on June 20th.

Madison—Graduate, undergraduate and honorary degrees to the number of 937 were conferred upon the members of the graduating class at the annual commencement exercises at the University of Wisconsin on June 20.

Of these, 808 were bachelor or other first degrees, 105 were master or other second degrees, 20 were doctor degrees, and three were honorary degrees. This is a large increase over the 850 degrees granted last June. In addition, 103 degrees of various grades have been granted since last commencement bringing the total number of degrees granted this year to 1420.

Of the 937 graduates, about 300 were women; almost one-fourth of the 1420 degrees. One woman received an honorary degree and one received a doctor's degree. About 300 of the graduates were registered from outside of Wisconsin.

The address to the graduating class was delivered by President C. R. Van Hise of the University, and the invocation was spoken by the Rev. Dr. Donald D. MacLaurin.

PLAN BUYING FIRST CAPITOL Legislative Finance Committee in Favor of Restoring Old Building Located at Leslie.

Madison—The Wisconsin legislature favors the preservation of the first territorial capitol of Wisconsin, located at Leslie, Wis. (now Leslie). The joint finance committee of the legislature has recommended an appropriation of \$2,000 for the purchase of the building, their removal to the site on which they were located in 1836, and the rebuilding of them as nearly as possible into the form in which they existed when the first territorial legislature met there in the fall of 1836.

For years past a barn for cows and horses and a hayrack, a Platteville bank in his reminiscences filed with the Wisconsin Historical society, the lower floor was used as a senate chamber, and the second story was used as the assembly chamber. Recently upwards of thirty members of the legislature visited the scene, and the opinion seems to be nearly unanimous in favor of the preservation.

Call Boys for U. S. Reserve. Madison—Louis E. Reber, junior labor adviser of the State Council of Defense is sending out a call to all boys between 16 and 20 to join the United States Boys' Working reserve.

Reber says that about Aug. 1 the country will be short of 2,000,000 men and that boys must make up this deficiency.

Will Resume Athletics. Madison—Intercollegiate athletics will be resumed next fall by the University of Wisconsin with such restrictions as conditions at that time may require. Approval of this action was voted by the faculty on recommendation of the athletic council.

Order State Batteries to Camp. Grand Day—Batteries B and E, First Wisconsin artillery, have been ordered to camp on Camp Douglas on July 2.

Four Hurt When Team Runs Away. Janesville—Mrs. Fred Hosenauer, Jr., is lying at the point of death with a fractured skull. Edith Engstrom, a fractured leg and a young man escaped with bruises when a team ran away while the party was returning from a fishing trip.

Stump Puller Killed; Kills Man. Janesville—Otto Slips, 34 years old, died here from injuries received when a stump puller slipped, striking him beneath the heart.

New Bank Is Incorporated. Madison—The state bank commissioner approved articles of incorporation of the Farmers' and Miners' bank of New Digging, Lafayette county, with a capital stock of \$10,000. Incorporators are George W. Watson, C. J. Vickers, H. J. Murphy, L. D. Adams, D. C. Berg and T. M. Triestly.

Badger Lieutenant Dies. Madison—Lieut. C. F. Elliott, Third United States cavalry, died at military hospital at Fort Bayard, N. M.

Gets Bargain in Ball. Fond du Lac—Charles Martin of Oxford was arrested here for a statutory offense. Ball was fixed at \$400. His attorney objected, so the bond was reduced to \$300.

Predict Big Berry Crop. Ashland—Blueberry bushes in the upper lake country are loaded with berries. The wild blueberry marshes and the thousands of acres of wild rice on the "Bad River" reservation also promise big crops.

Gets Bargain in Ball. Fond du Lac—Charles Martin of Oxford was arrested here for a statutory offense. Ball was fixed at \$400. His attorney objected, so the bond was reduced to \$300.

Gets Bargain in Ball. Fond du Lac—Charles Martin of Oxford was arrested here for a statutory offense. Ball was fixed at \$400. His attorney objected, so the bond was reduced to \$300.

## ASSEMBLY PASSES FIREMEN MEASURE

MEMBERS OF DEPARTMENT IN ONE DAY OFF IN THREE.

## FAIR AID BILL LAID OVER

Amendment to Frohman Measure Introduced in Assembly Providing for State Aid to Only One Exhibit in Each County.

Madison—The assembly tabled the Otto bill to pension superannuated and disabled employees of the city of Milwaukee at the request of the author. It is understood that an amendment is to be offered to the bill.

The Gettelman bill, which provides for days of rest for firemen, was passed by the assembly. The bill provides that firemen in cities of the first class are to have one day off in three. Those in cities of the second and third class one day off in four and those in cities of the fourth class one day off in every 188 hours.

The Pieper bill, which provided that the legislative appropriations be made for two years and that all appropriations now made be void after June 3, 1919, was killed.

The Bray bill relating to the licensing of persons who sell securities as a method of strengthening the blue sky law was killed.

The following bills were passed after senate amendments had been made in the assembly:

The Chappell resolution to provide for the appointment of a special legislative committee to investigate the subject of social insurance, the Hansen bill relating to the distribution of safety first literature to automobilists, the Whittingham bill relating to bonds for the redemption of out-of-state lands, the Hansen warehouse bill and the bill by Senator Hansen affecting justice of the peace. A bill by aid for farms was laid over.

## BILL'S SISTER'S HUSBAND'S TROUBLE

## FUEL SUPPLIES SEIZED RUSS ARMY TO FIGHT

PRICES ON COAL AND OIL FOR U. S. NAVY TO BE FIXED.

Steel Also Is Commandeered for the Building of Vessels—Fair Profit for Dealers.

Washington, June 20.—Secretary Daniels has ordered coal and oil producers to supply the enormous quantities needed by the navy at prices to be fixed later by the commission.

The federal trade commission has determined a fair rate. The navy will use 1,750,000 tons of coal and 50,000,000 barrels of oil purchased under this application of the authorities granted by congress.

Similarly steel for the entire navy building program is being bought at a rate fixed when Secretary Daniels rejected the proposals of the steel makers at too high.

Secretary Daniels said that the coal operators proposed to furnish navy coal at a rate of \$2.65 a ton at the mine. The navy has been paying \$2.85 a ton.

The secretary directed the companies to ship immediately, the orders being prorated among the producers, agreeing to pay a tentative price of \$2.85 at the mines pending a report from the federal trade commission.

Oil quotations submitted Mr. Daniels, said, ranged from \$1.58 to \$1.80 a barrel, delivered from Port Arthur, although the present rate is \$1.85 a barrel at that point.

The department directed the producers to fill the orders for 50,000,000 barrels, leaving the question of price to be determined by the trade commission.

FOR BIG U. S. AIR FLEET One Hundred Thousand American Airplanes Will Be Rushed to France—President Approves.

Washington, June 19.—Secretary of War Baker, in an interview, officially endorsed the plan to put an overwhelming force of American airplanes on the European battle front in the shortest possible time.

It is understood that the war department has prepared plans involving the expenditure of \$900,000,000 in the immediate construction of a vast fleet of airplanes, and that estimates covering the plans will be forwarded to congress.

The statement by Secretary Baker is regarded as doubly important so far as consumption of the gigantic plan to put upward of 100,000 airplanes into action if necessary, because it shows that President Wilson himself is squarely behind the proposition.

WEEK'S SINKINGS ARE HIGH Total of British Losses Among Worst on Record—Twenty-seven Vessels Are Destroyed.

Chicago, June 22.—Twenty-seven British ships of more than 1,600 tons have been sunk, according to the weekly British summary. Five British vessels under 1,600 tons also were sent to the bottom. No fishing vessels were destroyed.

Take Alleged Cuban Rebels. New York, June 20.—Five Cubans, said to have been implicated in the recent uprising, who had taken refuge in Haiti, reached here on a Dutch steamship in custody of American officers. They were arrested and brought to the United States, officers of the ship said, on orders from Washington.

Crops Retarded Two Weeks. Springfield, Ill., June 22.—Cold weather has set the season back two weeks so far as growing crops are concerned, the weekly crop bulletins for the period ending June 19, issued by the federal weather bureau states.

Police Chief Ruca Killed. Natchez, La., June 22.—Chief of Police Leo Ruca and Ernest Prichard were killed and School Superintendent L. E. Hudson was fatally wounded by George Pike, a drunken negro, who was finally killed.

Judson C. Clements Dead. Washington, June 20.—Commander of the U. S. Navy, the late Judson C. Clements died here today. He had served on the rate-making body since 1892 and once had been chairman.

Sinn Fein Freed. Dublin, Ireland, June 20.—Count Plunkett, member of parliament and Sinn Fein, and the other members of the Sinn Fein who were arrested on June 9, were released from prison on Monday afternoon.

French Freighter Is Sunk. New York, June 19.—News of the destruction of the French freighter submarine, with a loss of one of the merchantmen's crew, was brought here by officers of a British freight vessel.

\$500,000 for Red Cross. Chicago, June 19.—A subscriber to the first Chicago Red Cross war fund has donated \$500,000. The fund has been established by the Red Cross and the city of Chicago.

Heavy Bail for Anarchists. New York, June 19.—Emma Goldman and Alexander Berkman, anarchists, arrested for inciting an anti-conscription feeling, waived examination in federal court and were remanded under \$25,000 bail each.

Police Chief Ruca Killed. Natchez, La., June 22.—Chief of Police Leo Ruca and Ernest Prichard were killed and School Superintendent L. E. Hudson was fatally wounded by George Pike, a drunken negro, who was finally killed.

Judson C. Clements Dead. Washington, June 20.—Commander of the U. S. Navy, the late Judson C. Clements died here today. He had served on the rate-making body since 1892 and once had been chairman.

Sinn Fein Freed. Dublin, Ireland, June 20.—Count Plunkett, member of parliament and Sinn Fein, and the other members of the Sinn Fein who were arrested on June 9, were released from prison on Monday afternoon.

# WHITTET EDUCATION BOARD BILL WINS

LOWER HOUSE CONCURS IN SPEAKER'S MEASURE BY VOTE OF 57 TO 23.

PRES. VAN HISE IS EXCLUDED

(Act Provides for State Board of Nine Members, Five to Be Appointed by Governor, One to Be a Woman.)

Madison—The Whittet central board of education bill was passed by the assembly, 57 to 23, just as it passed the senate, and will be messaged immediately to the governor so that the five appointments can be submitted to the legislature. The bill as concurred in is in the form of the Staudenmeyer substitute.

The bill provides for a state board of education of nine members, five of whom shall be appointed by the governor for terms ranging from one to five years. One of the appointments must be a woman and all five appointments must be confirmed by the senate. The other members are the superintendent, state superintendent and the normal and one representative of the university regents.

By provision it is impossible for President Van Hise to be a member. The secretary of state will be a member until the expiration of his present term. The board's present powers are curtailed. The new board will pass upon education budgets of the university and normal schools and the capital accounts of these institutions. The appropriations by the legislature go direct to the separate institutions and the separate board of regents. The bill has the support of President Van Hise and Gov. Phillips.

Debate on the school bill was opened by Carl Hansen, who opposed the measure. He read statistics indicating that a rigid supervision of university finances was needed. Whittet should have the power to make the budget and pass on capital and recommendations.

The assembly passed the bill appropriating \$37,200 for the biennial period and authorizing the university to conduct investigation work in stamp pulling in north of the border.

The bill now goes to the governor.

## GOV. VETOS FREE PASS BILL

Says Railroad Transportation Privilege Proposed for Editors Violates Constitution.

Madison—Gov. Phillips has vetoed the Burnett bill, permitting railroad companies to exchange passenger transportation for advertising space in daily and weekly newspapers. He vetoed the bill because he considered it unconstitutional and against good public policy. The bill sought to permit a railroad company to exchange transportation over its lines between points in Wisconsin for the use of more than 2,500 miles annually, to any daily or weekly newspaper published in the state in exchange for advertising, providing the editor did not hold a public office of trust or profit.

The transportation was for the editor and members of his family dependent upon him. In his veto, the governor reviewed at considerable length the long contest waged in Wisconsin over railroad freight and passenger rates, and for the passage of a law prohibiting railroads from giving away passes or discounting fares to a weekly or daily newspaper, and the members of his family dependent on him, could ride on transportation secured in exchange for advertising space in his newspaper.

Gun Discharge Causes Death. Oshkosh—The death of Chas. Cury, one of the leading manufacturers and business men of this city, was found in the basement of his home. Near the body was a shot gun cleaning rod while his favorite gun was securely fastened in a vise at which he had been accustomed to clean the weapons. The death was caused by a wound in the left breast apparently the result of an accidental discharge of the gun.

Assemblyman's Daughter Weds. Fond du Lac—Miss Augusta Pickart, daughter of former Assemblyman Chas. Pickart, was married here to William F. Phelan.

Archbishop Messenger to Ordain. Oconomowoc—Ordination ceremonies will be held at the chapel of the Redemptorist college on Lac La Belle, Oconomowoc, on June 20 and July 1, 2. Archbishop Messenger of Milwaukee conferring the holy orders.

May Draft 700 at Fond du Lac. Fond du Lac—Including the national guard and regulars 700 men will be drafted in this county on the first call, according to H. E. Sweet, chairman of the county defense council.

Wife Slayer Takes Own Life. Frederic—The body of Oscar Dunn, who in a jealous rage shot and killed his wife at their home near here, was found in a clump of bushes not far from the house with a bullet wound in the temple.

State Capitol Dedication Delayed. Madison—There will be no dedication of Wisconsin's new \$6,000,000 state capitol this year. Senator Thos. Burke of Green Bay withdrew the resolution from consideration.

Gets Munitions Board Post. Madison—Prof. Ralph H. Hess of the political science department at the University of Wisconsin, has left for Washington, D. C., to report for staff duty on the general munitions board.

Jokes Lead to Suicide. Fond du Lac—After being "kidded" for several days over the fact that he registered for army service, Matthew Moister, 24 years old, suicided by hanging in the town of Forest.

## DRAFT MAY MISS 5 COUNTIES

Adj. Gen. Holway Pleds State to Determine Number of Men to Be Called Out.

Madison—When President Wilson proclaimed the first draft to call the regular army and the national guard, he will find Wisconsin far ahead of the schedule, according to Adj. Gen. Orlando Holway, who has just completed a poll of the state by counties to determine how many men each county will have to furnish.

Under the draft act the quota for each state is determined according to the population and credit is to be given for the number of men who were on for military service in the guard on April 1 or who have entered the guard or the regular army since that date. Holway's toll does not include the men who have enlisted in the regular army since April 1. He is still seeking this information.

According to Gen. Holway's figures the following counties will be exempt from the first draft: Ashland, Forest, Green, Pepin and Sawyer.

The first draft is proposed to bring the strength of the army and the guard to 750,000. Wisconsin's national guard strength, when completed by recruiting will be 21,500 men, part of which will offset the first draft to fill the army and will also be a part offset to the second draft of 500,000. The second draft will bring Wisconsin's quota of men to 32,000. Add to Wisconsin's 21,500 guardmen 2,500 men enlisted in the regular army since April 1, and Wisconsin will have to furnish only about 8,000 men under the second draft.

Gen. Holway, however, is urging enlistment in the guard or regular army continually in the hope that when the second draft comes Wisconsin will already have completed its quota of 32,000. A campaign to enlist 2,000 men has been started in forty-two counties in Wisconsin, and the date set for the completion of this work is July 1. If the goal is reached, 150 men must volunteer for service every twenty-four hours, or four to a county.

## 937 GRADUATE AT MADISON

Annual Commencement Exercises of University of Wisconsin Held on June 20th.

Madison—Graduate, undergraduate and honorary degrees to the number of 937 were conferred upon the members of the graduating class at the annual commencement exercises at the University of Wisconsin on June 20.

Of these, 808 were bachelor or other first degrees, 105 were master or second degrees, 23 were doctor degrees, and three were honorary degrees. This is a large increase over the 850 degrees granted last year. In addition, 103 degrees of various grades have been granted since last commencement bringing the total number of degrees granted to 10,040.

Of the 937 graduates, about 325 were women; almost one-fourth of the 112 who received higher degrees were women. One woman received an honorary degree and one received a doctor's degree. About 300 of the graduates were registered from outside of Wisconsin.

The address to the graduating class was delivered by President C. R. Van Hise of the University, and the invocation was spoken by the Rev. Dr. Donald D. MacFarlane.

## PLAN BUYING FIRST CAPITAL

Legislative Finance Committee in Favor of Restoring Old Buildings Located at Leslie.

Madison—The Wisconsin legislature favors the preservation of the first territorial capitol of Wisconsin, located at Belmont (now Leslie). The joint finance committee of the legislature has recommended an appropriation of \$3,000 for the purchase of the building and for the removal of the site on which they were located in 1836, and the rebuilding of the form in which they existed when the first territorial legislature met there in the fall of 1836. For years past the old capitol has been used as a place for cows and horses and hay. According to Joseph H. Evans, a Plattville banker, in his reminiscences filed with the Wisconsin Historical society, the lower floor was used as a senate chamber, and the second story was used as the assembly chamber. It was used as a warehouse for the produce of the present legislature visited the scene, and the opinion seems to be nearly unanimous in favor of the preservation.

## Call Boys for U. S. Reserve.

Madison—Louis E. Reber, junior labor adviser of the State Council of Defense is sending out a call to all boys between 16 and 20 to join the United States Boys' Working reserve.

Mr. Reber says that about 400,000 men country will be short of 2,000,000 men and that boys must make up this deficiency.

## Will Resume Athletics.

Madison—Intercollegiate athletics will be resumed next fall by the University of Wisconsin with such restrictions as conditions at that time may require. Approval of this action was voted by the faculty on recommendation of the athletic council.

## Order State Battles to Camp.

Grand Day—Battles B and E, first Wisconsin artillery, have been ordered to train for Camp Douglas on July 2.

## Four Hurt When Team Runs Away.

Janesville—Mrs. Fred Aleson, Jr., is lying at the point of death with a fractured skull. Both Aleson suffered a broken leg and two young men escaped with bruises when a team ran away while the party was returning from a fishing trip.

## Stump Puller Slips; Kills Man.

Janesville—Otto Krebs, 34 years old, died here from injuries received when a stump puller slipped, striking him beneath the heart.

## New Bank Is Incorporated.

Madison—The state bank commission approved articles of incorporation of the Farmers' and Miners' bank of New Diggins, Lafayette county, with a capital stock of \$10,000. Incorporators are George W. Watson, C. J. Vickers, I. J. Murphy, L. D. Adams, B. C. Burk and M. T. Tristram.

# ASSEMBLY PASSES FIREMEN MEASURE

MEMBERS OF DEPARTMENT IN FIRST CLASS CITIES TO GET ONE DAY OFF IN THREE.

FAIR AID BILL LAID OVER

Amendment to Frohman Measure Introduced in Assembly Providing for State Aid to Only One Exhibit in Each County.

Madison—The assembly tabled the Otto bill to pension superannuated and disabled employees of the city of Milwaukee at the request of the author. It is understood that an amendment is to be offered to the bill.

The Ottemann bill, which provides for days of rest for firemen, was passed. Firemen in cities of the first class are to have one day off in three. Those in cities of the second and third class one day off in four and those in cities of the fourth class one day off in every 168 hours.

The Pomer bill, which provided that the legislative appropriations be made for two years and that all appropriations now made be void after June 3, 1919, was killed.

The Gray bill relating to the licensing of persons who sell securities of food as a method of strengthening the blue sky law was killed. The following bills were passed after senate amendments had been concurred in: The Chapple resolution to provide for the appointment of a special legislative committee to investigate the subject of fire insurance; the Hansen bill relating to the distribution of safety first literature to automobilists; the Whittingham bill relating to bonds for the reclamation of cutover lands; the Hansen warehouse bill and the bill by Senator Hansen affecting justice of the peace.

A bill by Assemblyman Frohman relating to the sale of fair was laid over after assemblyman Woodward introduced an amendment providing that not more than one fair in each county should receive state aid.

## WOULD LICENSE BOTTLERS

Bill Makes Soda Water Makers Subject to Supervision of Dairy and Food Department.

Madison—Manufacturers who engage in the bottling of soda water beverages must secure a license and be subject to the general supervision of the dairy and food department, under a senate bill, concurred in by the assembly.

The measure was considerably debated and was opposed by E. J. Poon of Ozaukee county, who moved non-concurrence of the bill. The bill was defended by Aulenbacher, Kurlenbacher and Young. Aulenbacher said he was interested in a factory of this kind as a good thing.

It was pointed out that the dairy and food department could only have unsanitary conditions at the present time in these factories by a court act. Under the provisions of the bill these factories will be licensed and unless establishments are kept in a sanitary condition, their license can be revoked by the department. The bill was concurred in, 53 to 7.

## BADGER MAN TO AID HOOVER

Dr. Charles McCarthy of Wisconsin Legislative Library Accepts Federal Position.

Madison—Wisconsin is to be closely identified with the movement to furnish food for the hungry countries of the world, except the common enemy, during the war.

Dr. Charles McCarthy of the legislative reference library, announced that he has accepted a position under Herbert Hoover, food director, at Washington, D. C., as an indefinite leave of absence granted by Gov. Phillips, to become connected with organization work.

## Women Organize Club.

Racine—The Racine Business Women's Social club has been organized here with a membership of thirty-five.

## Big Load of Cheese.

Antigo—A load of cheese weighing 4,400 pounds and worth more than \$1,000 was hauled to this city from a nearby cheese factory. The consignment was shipped to Texas. A consignment of Landolfe county cheese was sent to England.

## Pass Bogged Checks.

Racine—Vogel checks of the Paul Rlesons Sons Co. of Milwaukee were passed here and thus far four shopkeepers are out \$240.

## Cattle for British.

Noah—Agents of the British government are making purchases of beef cattle in the locality. The cattle are being shipped to Canada where they will be slaughtered and shipped to England.

## Muscle Director Resigns.

Stevens Point—After a year and a half as director of muscle in the normal school here, Miss Mabelle M. Shelton has resigned. No successor has been named.

## Predict Big Berry Crop.

Ashland—Blueberry bushes in the upper lake country are loaded with berries. The wild cranberry marshes and the thousands of acres of wild rice on the Bad River reservation also promise big crops.

## Gets Bargain in Ball.

Fond du Lac—Charles Martin of Oxford, Wis., was fined \$400 for a stolen baseball. He was fined \$400 for a stolen baseball. He was fined \$400 for a stolen baseball.

## Badger Lieutenant Dies.

Madison—Lieut. C. F. Elliott, Third United States cavalry, died at the military hospital at Fort Bayard, N. M., was reduced to \$298.

# BILL'S SISTER'S HUSBAND'S TROUBLE

New York Evening Telegram.

## FUEL SUPPLIES SEIZED RUSS ARMY TO FIGHT

PRICES ON COAL AND OIL FOR U. S. NAVY TO BE FIXED.

Steel Also Is Commandeered for the Building of Vessels—Fair Profit for Dealers.

Washington, June 20.—Secretary Daniels has ordered coal and oil producers to supply the enormous quantities needed by the navy at prices to be fixed later by the president when the federal trade commission has determined a fair rate. The navy will use 1,750,000 tons of coal and 50,000,000 barrels of oil during the year. This application of the authorities granted by congress.

Similarly steel for the entire navy building program is being bought at a rate fixed when Secretary Daniels rejected the proposals of the steel manufacturers.

Secretary Daniels said that the coal operators proposed to furnish navy coal at a rate of \$2.95 a ton at the mine. The navy has been paying \$2.85 a ton delivered. The secretary directed the companies to ship immediately the orders being prompted among the producers, agreeing to pay a five percent advance on the price pending a report from the federal trade commission.

Oil quotations submitted Mr. Daniels, ranged from \$1.58 to \$1.80 a barrel, delivered at Port Arthur, although the present rate is 85 cents a barrel at that point. The department directed the producers to fill its orders for 50,000,000 barrels, leaving the question of price to be determined by the trade commission.

## BRITISH WIN IN RECORD TIME

General Haig's Troops Capture German Positions in Fight That Lasts Two Minutes.

British Headquarters in France, June 20.—The war's latest development is a two-minute battle. It took the British just that long to capture three-quarters of a mile of trenches on Infantry hill, east of Comblanchien. The time for "killing over the top" was set for 7.25 and at 7.27 rockets signaled the fact all along the line attacked that the objectives had been taken.

The British stole out of their trenches in broad daylight without a single shot of artillery preparation having been fired, rushed across the main line, and in half an hour the German position at breakfast and took three officers and 175 other prisoners.

## PRESENT VALLEY FORGE ARCH

National and State Officers Take Part in Historic Ceremonies—Champ Clark Makes Presentation.

Valley Forge, Pa., June 20.—Marking the site of the encampment of the Continental army during the winter of 1777-78, a memorial arch, for which congress appropriated \$125,000, was presented to the state by Champ Clark, speaker of the house of representatives, on behalf of the government. More than a hundred senators and congressmen who came here by special train from Washington attended the exercises.

## To Seize Draft Slackers.

Boston, June 21.—Notice that all men of military age who failed to register under the selective draft law would be arrested after June 25 was sent out by District Attorney George W. Anderson.

## Twelve French Airmen in N. Y.

New York, June 21.—Capt. Achille Rivier, in charge of 12 French aviators, arrived here on route to Washington. The French aviators will be assigned to American aviation schools as instructors.

## Goethals Orders More Ships.

Washington, June 20.—Contracts for ten more steel merchant ships complete and for 24 additional wooden hulls were awarded by Judge Goethals in custody of American officers. They were arrested and brought to the United States, officers of the ship said, on orders from Washington.

## Crops Retarded Two Weeks.

Springfield, Ill., June 22.—Cold weather has set the season back two weeks so that as growing crops are expected to be ready for harvest for the period ending June 19, issued by the federal weather bureau states.

## Police Chief Ruses Killed.

Natchitoches, La., June 22.—Chief of Police Leo Ruses and Ernest Frubel were killed and School Superintendent L. B. Hudson was fatally wounded by George Pikes, a drunken negro, who was finally killed.

## Judson C. Clements Dead.

Washington, June 20.—Commissioner of Judson C. Clements of the interstate commerce commission died here on Monday. He had served on the rate-making body since 1892 and once had been chairman.

## Sinn Felner Freed.

Dublin, Ireland, June 20.—Connel Plunkett, member of parliament and Sinn Felner, and the other members of the Sinn Felner who were arrested on June 9, were released from prison on Monday afternoon.

## French Freighter Is Sunk.

New York, June 19.—News of the destruction of the French freighter "Sinn Felner" by a German submarine, with a loss of one of the merchantmen's crew, was brought here by officers of a British freight vessel.

# VOLUNTEERS WANTED

PRESIDENT URGES 70,000 MEN TO ENLIST IN THE REGULAR ARMY.

WILL START DRAFT SOON

Operation of Conscription Law Will Begin After July 1—Labor Men on Exemption Boards—Guards Join Army July 15.

Washington, June 22.—President Wilson issued a proclamation here designating the week of June 23-30 as recruiting week for the regular army and called upon untrained men without dependents to enroll for war service in order that the ranks of the regulars might be filled promptly.

The proclamation follows: "I hereby designate the period of June 23 to June 30, next, as recruiting week for the regular army and call upon untrained men between the ages of eighteen and forty years, who have no dependents and who are not engaged in pursuits vitally necessary to the prosecution of the war, to present themselves for enlistment during the week herein designated, to the number of 70,000.

"WOODROW WILSON." It had been hoped that the regular army could be brought to its whole strength of approximately 300,000 men by June 30, which would have permitted the war department to carry out its plan in regard to the training of the forces to be raised and also as to the dispatch of armies to France.

Plans of the administration to make immediately available a great army, which will be thrown into the balance against Germany as rapidly as it can be transported to Europe, were revealed here.

The entire National Guard of the country will have become a constituent part of the regular army within the next 45 days.

Drafting of the guardsmen will be accomplished by three executive orders. The first draft order will be issued July 15, the second July 25, and the third August 5.

Further army is to be sent to Europe first. The last of the units of this class which can be utilized will bid farewell to American shores at a date near at hand.

## U. S. TO RUN MINES AND LINES

Trade Board Says It Is Only Way to Avert Shortage—Fuel Famine Predicted.

Washington, June 22.—Government pools of coal production and distribution and of rail and water transportation were recommended to congress on Wednesday by the federal trade commission as the only means of averting a disastrous coal shortage next winter.

"The commission believes," says the report, submitted after many months of investigation ordered by congress, "that the coal industry is paralyzing the industries of the country and that the coal industry itself is paralyzed by the failure of transportation. There are enough coal cars in the country, but not enough are delivered to the mines, and these cars are not moved to the point of consumption with the greatest expedition, nor are they promptly discharged."

In view of these conditions the commission recommends: "1. That the production and distribution of coal and coke be conducted by a government agency; that the producers of various grades of fuel be paid their full cost of production, plus a uniform profit per ton (with due allowance for quality of product and efficiency of service); and,

"2. That the transportation agencies of the United States, both rail and water, be similarly pooled and operated on government account, under the direction of the president, and that all such means of transportation be operated as a unit, the owning corporations being paid a just and fair compensation which would cover normal profit, upkeep and betterment."

## SAVE RECRUITS SAYS DANIELS

Secretary of the Navy Makes Vice Charges at Newport in Plea to Governor.

Washington, June 22.—Sensational charges that naval recruits at Newport, R. I., training station are exposed to open gambling houses, immoral resorts and illegal sales of liquor were made on Wednesday by Secretary Daniels in announcing that he had appealed to Governor Beekman.

## Admiral Jellicoe's Nephew Enlists.

New York, June 22.—H. J. Jellicoe, nephew of Admiral Jellicoe of the British navy, enlisted for the English aviation corps at the British recruiting station here. He was sent to an aviation training camp in Canada.

## "Bone-Dry" Reunion at Harvard.

Cambridge, Mass., June 22.—Old Harvard men, returning for commencement, found that the university was celebrating on a "bone-dry" schedule for the first time in its history. Drinks at class celebrations are now barred.

## Take Captain for Murder.

New Brunswick, N. J., June 21.—A warrant for the arrest of Dr. William J. Conlon, a captain in the United States army medical corps, was issued in connection with the murder of John V. Piper.

## Kidnaping Suspect Arrested.

Springfield, Mo., June 21.—Dick Carter, against whom a warrant has been issued charging first-degree murder in connection with the kidnaping of "Bud" Keet, was arrested in Hutchinson, Kan.

## Russ Navy Commander Quits.

Petrograd, June 21.—Admiral Madi-noff, commander of the Black sea fleet, has left his post and will be replaced by Rear Admiral Voderzsky. General Yudevitch has been replaced by General Previslavsky.

## Diver Sinks Big Transport.

Paris, June 20.—The transport Anan was torpedoed in the Ionian sea on June 11 while proceeding under escort. Bombs were at once thrown in the track of the submarine, which did not respond.

# HITS FOOD GAMBLERS

HOOPER SAYS SPECULATORS LOOTED COUNTRY OF \$250,000,000 IN FIVE MONTHS.

SPEAKS FOR CONTROL BILL

Denies Intent to Impose Rations or Restrict Farmers' Initiative—Declares Rusa Revolution Has Caused Food Shortage.

Washington, June 21.—Food speculators have been taking \$500,000,000 a month for the last five months—a total of a quarter of a billion dollars—from the American people, Herbert C. Hoover told senators on Tuesday, in explaining the purposes of the food control bill now before congress.

Mr. Hoover outlined broadly the question of prospective food supplies. "Despite the reduced consumption of the allies they will require a larger amount of cereals next year than ever before. The allies are more isolated in food sources. It takes three times the tonnage and double the trouble to get Australian wheat. Crop failures in the Argentine give no hope of relief from above before the spring.

"The allies are dependent upon North America for the vast majority of their food imports. We should be able to supply 60 percent of what they require. The other 40 percent must be made up by further denial on their part and saving on ours. We can increase our surplus. The situation for this next year means increased production. Without an adequate food supply no European population will continue the fight and we shall find ourselves alone against Germany.

"The Russian revolution was a food riot and even yet that ally is temporarily paralyzed. Responsibility rests on our government for failure of domestic production. The action of Mr. Hoover denied that the bill establishes a food dictatorship.

A commission to take charge of production and distribution of flour, sugar, and possibly a few other principal commodities, Mr. Hoover said, is contemplated.

## MILLION U. S. MEN TO FRANCE

Gen. Pershing to Be Re-Enforced by Large Number of National Guardsmen.

Washington, June 21.—America's plans for participating in the war unfolded rapidly during the day. "These things became known: 1. There will be a second draft with in a few months after the first 625,000 conscripts go into training.

2. Pershing's division will be re-enforced immediately by another large force of picked troops and by September 1 divisions of National Guardsmen will be moving overseas.

3. The New York National Guard will be the first. These will be followed by the Illinois militia. Indications are that the second draft will be made not later than November and call probably another 625,000 men.

More may be called, as the general staff is planning to fill all vacancies through the draft. It may be 1,000,000 before Christmas. Recalled men must keep themselves informed as to whether or not they have been drafted. This proclamation was issued by Provost Marshal General Crowder.

**Our country!** In her intercourse with foreign nations may she always be in the right; but our country, right or wrong.—Stephen Decatur.

The question is often asked, "How many state employees are there?" The number varies considerably during the course of the year, but, according to the last compilation of the total number was 9,780. Of that number, the University has 1,181, consisting of 711 instructors and 470 other employees. The University is therefore the largest employing institution, having nearly one-third the total. The Normal schools, Stout Institute and other state schools have 220, of which 418 are instructors and 122 are otherwise engaged. The charitable and penal institutions have a total of 964, of which 144 are teachers in the industrial and other special schools. The judicial employees are 67, including supreme and circuit court judges and court reporters. All other employees, including those employed in the state capitol, field workers, such as game and forest wardens, oil inspectors, and traveling agents, number 1,003. There are about 700 employees in the state capitol, or less than one-fifth the total of state employees. More than half of the employees are engaged in the educational institutions and in educational work—Black River Falls Journal, Secretary of State Meritt Hull's paper.

**Idlers Are Slackers**  
Idlers are slackers! The moral tone of every community ought to make it decidedly uncomfortable for any idle person this season. Such is the sentiment of the State Council of Defense, which finds that farmers throughout the state need extra help in cultivating and harvesting crops. It also finds that experienced farm help is not available. There are, however, many boys and men whose time is unemployed or only partly occupied. They are not doing their full patriotic duty unless they try to help all the time at some productive employment.

The slogan of the State Council of Defense is "Every man on a job." This means that all boys and young men must work. It means that mothers, business men, clerks and others whose time is not occupied must use their spare hours and days and their vacation periods.

Let every such person register with the Labor Agent of his county Council of Defense. Then let him work when he is notified that his services are needed.

There are jobs for all and to spare. Don't be a slacker!

**URGES SILO REACTION**  
The University of Wisconsin is conducting a campaign to induce Wisconsin farmers to erect silos. According to those who know, the silo is not an expense to the farmer, but a money maker for him and a good thing for the state and country at large. In some instances, it is stated, the cost of a silo is almost saved the first year by the farmer who puts up one, besides which it helps to conserve the resources of the state.

It is stated that a farmer who stores his corn in a silo will receive from ten to fifteen per cent more milk from his cows than when giving them silage. The reason for this is that silage is worth considerably more in other ways than if dried and fed to the cows in the shape of corn. Dry corn is not much of a milk producer, while silage is one of the best that grows.

Then, in this part of Wisconsin, there is often a season when frost comes so early that corn does not have a chance to ripen, and when it is spoiled in this manner it is of little value, while there is never a season when corn cannot be raised for the silo, giving a feed that has no equal.

In some sections of the country the farmers are so anxious to get their milk cows that they feed to their milk cows the entire year, claiming in this way they can get results that cannot be equalled in any other. As those who have a silo and who have had one for a number of years past, and this alone tells the story.

**WAGE WARFARE FOR BUMPER POTATO CROP**  
Over 300,000 acres of Wisconsin land will soon have been planted to potatoes, but next fall's crop is not assured until noxious weeds, potato beetle and blight have been successfully combated.

High this can best be done is pointed out in a bulletin recently issued by the University of Wisconsin.

Killing weeds by early working of the fields will save hand labor later in the season.

The spike tooth harrow or other light cultivation tool should be run over the field to kill young weeds before the potato roots become visible.

High hilling is not advisable if there is danger of drought, but may be practiced in the cooler sections or where the land is heavy to provide for better drainage. On sandy soils, low cultivation is best.

Potato spraying involves two periods, first the control of the beetle in July, and later the use of Bordeaux mixture against blight.

In hot moist weather the "bugs" will hatch rapidly and do much damage unless promptly killed with poisons. Paris green, 3 pounds to 50 gallons of water, is recommended for dry arid soil. 4 pounds to 50 gallons of water may be used.

Spraying for blight commonly begins during the first week of August. The weather, condition of growth, and general danger will largely determine the frequency of application. This is the formula for Bordeaux mixture: Copper sulphate, 8 pounds; stone lime, 10 pounds; and water 100 gallons.

**REAL DANGER**  
Sho—Do you really believe that kissing is dangerous?  
Yes—Well—Or—I believe it sometimes results in a breach of promise suit.

**REAL THING**  
Guest—Waiter, I see you have turtle soup on the menu. Is it mock turtle?  
Waiter—No, sah; it's plain every-day mud turtle, sah.

**FIFTY KINDS OF LICENSES**  
ASSESSED IN WISCONSIN  
About 50 different activities are assessed license fees in the 128 cities of Wisconsin, and diverse practices are in vogue in various localities, according to an inquiry recently made by the University of Wisconsin Extension division.

Some of the activities and things which are licensed are bill posters, utility men, distributors of medicine, plumbers, pool tables, rumormongers, solicitors, entertainments, shows, exhibits, menageries, excavators of streets and sidewalks, storage of gun powder, drugs, train layers, drunks, motorcycles, building within the city limit, building movers, laying of service pipes, theaters, opera houses, transient merchants, vehicles for transportation, stands for pop corn, candy and lunch, second hand stores, making of sidewalks, and autos for hire.

License fees for the selling of liquor range from \$50 in 37 cities to \$1,000 in one city, \$500 is charged in 27 cities. Some cities charge pharmacists \$10 a year for selling liquors.

Moving picture houses are charged from \$10 to \$50 a year.

Dogs are licensed in all cities with a fairly uniform fee of \$1 or \$2. Fortune tellers and clairvoyants are prohibited in many cities and in others they are charged \$10 a day. Circus license fees range from \$25 a day to \$500 a day.

**VEGETABLE SPECIALIST TO EASTERN COLLEGE**  
J. H. Repler, in charge of classes in vegetable gardening and greenhouse work at the University of Wisconsin for the past six years, has resigned to accept the position of assistant professor of horticulture at the New Hampshire Agricultural college, at Durham. Mr. Repler, who is a graduate of the Pennsylvania State College of Agriculture and an experienced track worker, is quite well known in Wisconsin, where he has done extension demonstration work at farmers' institutes and schools, in addition to his instruction work at the College of Agriculture.

**WILL CORN MATURE?**  
If present crop conditions are any criterion, only good growing weather in July and August, accompanied by a September without killing frosts, will insure maturing the great corn crop of the north. Spring grain may promise excellent crops, but though corn has come well, with scarcely a hill missing in most fields, it has made but small growth and June has continued cold and backward. This combined with the fact that much of the low land has either not been planted or was planted after June 15th, would indicate the very reasonable expectation of the necessity of harvesting an immature corn crop.

With this outlook the live stock farmer without a silo, or without sufficient silage capacity, is in poor condition for economical milk and beef production next winter. The silo spells economy for the best of corn crops, but it is an absolute necessity if reasonable returns are to be expected from an immature crop.

One man has said: "There ought to be a million silos built and filled before the growing season is over. They will not only help to win the war but will make living cheaper after the war." Yes, we need more silos.

"We need them to feed our dairy cows to the best advantage and to secure maximum returns. This year, if never before, a silo will more than pay for itself in a year. The next two months the farm slogan should be: 'Build a Silo.' To some this may seem altruistic patriotism, but to us it is essentially good judgment and sound business foresight dictated by intelligent self interest.

The desire for a silo has entered many a farmer's thought, but he has neglected to translate that desire into action. Don't put off until too late. Until the necessity of a silo is demonstrated by intelligent self interest.

It is to be hoped the corn crop will mature; but even should our hope be realized, the silo will be a good investment. The successful man considers and acts, the unsuccessful man merely considers. Reprint of editorial in Hoard's Dairyman of July 6, 1917.

**THE JOURNAL CUP**  
More people than ever before will be interested in the Wisconsin State fair in 1917. One of the main departments—that of farming and the raising of fruits, vegetables and the like, will be larger, too, than ever before. The season of war existing between this country and Germany has made the necessity for raising foodstuffs greater than ever. There is scarcely a farmer in the state of Wisconsin that will not have double the crop of former years, and this year he is raising several kinds of vegetables he has not before cultivated.

For this reason, the county exhibits at the State fair will be larger and more numerous than in past years. Countless that have not entered the competition for The Journal cup, and blue ribbons in former years, will this year be early on the ground with their exhibits.

The cup is a beautiful piece of the silversmith's art. The base is 5 inches in high, while the cup itself is 14 inches in diameter. From handle to handle, it measures 11 inches.

On one side the lettering is already done, with the exception of the name of the county which will receive the cup for the best exhibit, and reads: "Presented by The Milwaukee Journal to the county for the best county exhibit in the Wisconsin State Fair of 1917."

It will be on exhibit in one of the downtown stores just previous to the fair, which will be from September 9 to 15.

**REAL DANGER**  
Sho—Do you really believe that kissing is dangerous?  
Yes—Well—Or—I believe it sometimes results in a breach of promise suit.

**REAL THING**  
Guest—Waiter, I see you have turtle soup on the menu. Is it mock turtle?  
Waiter—No, sah; it's plain every-day mud turtle, sah.

**County Registration List**  
(Continued from last week)

**“Our country!”** In her intercourse  
 with other nations may she always  
 be in the right; but our country, right  
 or wrong.—Stephen Decatur.

The question is often asked, “How  
 many state employees are there?” During  
 number varies considerably from  
 the course of the year, more being  
 employed at one season than another,  
 but, according to the last compilation,  
 the total number was 2,789. Of that  
 number, the University has 1,181,  
 consisting of 711 instructors and 470  
 other employees. The University is  
 therefore the largest employer in  
 the state, having nearly one-third the  
 total number of state employees.

The normal schools, Stout in-  
 stitute and other state schools have  
 526, of which 413 are instructors and  
 113 are other employees. The  
 charitable and penal institutions  
 have a total of 564, of which 143  
 are teachers in the industrial and  
 other special schools. The judicial  
 employees are 67, including supreme  
 court judges and court  
 reporters. All other employees, in-  
 cluding those employed in the state  
 capital, field workers, such as game  
 and forest wardens, oil inspectors,  
 and traveling agents, number 1,003.  
 There are about 700 employees in  
 the state capital, or less than half  
 the total number of state employ-  
 ees. More than half of all employees are  
 engaged in the educational insti-  
 tutions and in educational work—Buck  
 River Falls Journal, Secretary of  
 State Meritt Hall's paper.

**OLDERS ARE SLACKERS**  
 The moral tone of every community ought to  
 be made it decidedly uncomfortable for  
 any idle person this season.

Such is the sentiment of the State  
 Council of Defense, which finds that  
 farmers do not state need extra  
 help in cultivating and harvesting  
 crops. It also finds that experienced  
 farm help is not available. The  
 council, however, many boys and men  
 whose time is unemployed or only  
 partly occupied. They are not doing  
 their full patriotic duty unless they  
 are busy all the time at some produc-  
 tive employment.

The slogan of the State Council of  
 Defense is “Every man on a job.”  
 This means that all boys and young  
 men must work. It means that min-  
 isters, business men, clerks and  
 others whose time is not occupied  
 must use their spare hours and days  
 and their vacation periods.  
 Let every such person register with  
 the Labor Agent of his county Council  
 of Defense. Then let him work  
 when he is notified that his services  
 are needed; jobs for all and to spare.  
 Don't be a slacker!

**URGES SILO ERECTION**  
 The University of Wisconsin is en-  
 gineering a campaign to induce Wis-  
 consin farmers to erect silos. The silo  
 is not an expense to the farmer, but  
 a money maker for him and a good  
 thing for the state and country.  
 The cost of a silo is almost saved the  
 first year by the farmer who puts up  
 one, besides which it helps to con-  
 serve the resources that a farmer who  
 stores his corn in a silo will receive  
 from ten to fifteen per cent more  
 milk from his cows than would be  
 received from cows which the silage  
 is worth considerably more in  
 other ways than if dried and fed to  
 the cows in the shape of corn. Dry  
 cow silage is not a milk producer,  
 while silage is one of the best that  
 grows.

Then, in this part of Wisconsin,  
 there is often a surplus of corn does  
 not have a chance to ripen, and when it  
 is spoiled in this manner it is of little  
 value, while there is never a season  
 when corn cannot be raised for the  
 silo, giving a feed that has no equal.

In some sections of the country the  
 farmers are so arranging things that  
 they can have silage to feed to their  
 cattle cover the entire year, claiming  
 in this way they can get results that  
 cannot be equalled in any other. As  
 these men are those who have made  
 a study of the feeding problem, they  
 should know what they are talking  
 about.

A trip thru the country will show  
 that the successful dairymen are those  
 who have a silo and who have  
 had one for a number of years past,  
 and this alone tells the story.

**WAGE WARFARE FOR  
 BUMPER POTATO CROP**  
 Over 300,000 acres of Wisconsin  
 land will soon have been planted to  
 potatoes, but next fall's crop is not  
 assured until noxious weeds, potato  
 beetle and blight have been success-  
 fully combated.

How this can best be done is  
 pointed out in a bulletin recently  
 issued by the University of Wiscon-  
 sin.

Killing weeds by early working of  
 the fields will save hand labor later  
 in the season.

The spikier tooth harrow or some  
 other light cultivation tool should be  
 run over the field to kill young weeds  
 before the potato rows become vis-  
 ible. Regular cultivation follows, but  
 this is not advisable if there is  
 danger of drought, but may be  
 practiced in the cooler sections or  
 where the land is heavy and pro-  
 vide for cultivation is best.

Potato spraying involves two pe-  
 riods, first the control of the beetle in  
 July, and later the use of Bordeaux  
 mixture against blight.

In hot moist weather the “bugs”  
 will hatch rapidly and do much  
 damage unless promptly killed with  
 poisons. Paris green, 3 pounds to 50  
 gallons of water, is recommended, or  
 dry arsenate of lead, 4 pounds to 50  
 gallons of water, may be used. The  
 weather, condition of growth,  
 and general danger will largely  
 determine the frequency of application.  
 This is the formula for Bordeaux  
 mixture: Copper sulphate, 8 pounds;  
 stone lime, 10 pounds, and water 100  
 gallons.

**FIFTY KINDS OF LICENSES  
 ASSESSED IN WISCONSIN**  
 About 50 different activities are  
 assessed license fees in the 128 cities  
 of Wisconsin, and diverse practices  
 are in vogue in various localities, ac-  
 cording to an inquiry recently made  
 by the municipal reference bureau of  
 the University of Wisconsin Exten-  
 sion division.

Some of the activities and things  
 which are licensed are bill posters,  
 dairy men, distributors of medicine,  
 plumbers, pool tables, runners and  
 solicitors, entertainments, shows, ex-  
 hibits, managers, excavators, work  
 powder, drugs, drain layers, drays,  
 motorcycles, building within the fire  
 limit, building movers, laying of set-  
 ting, transient merchants, vehicles for  
 transportation, stands for pop corn,  
 candy and lunch, second hand stores,  
 making of sidewalks, and autos for  
 hire.

License fees for the selling of li-  
 quor range from \$100 in 37 cities to  
 \$1,000 in one city, \$500 is charged  
 in 27 cities. Some 55 cities charge  
 license fees \$10 a year for selling  
 liquors.

Moving picture houses are charged  
 from \$10 to \$60 a year. In all cities with  
 a fairly uniform fee of \$1 or \$2.  
 Fortune tellers and clairvoyants are  
 prohibited in many cities and in  
 others they are charged \$10 a day.  
 Circus license fees range from \$25 a  
 day to \$500 a day.

**VEGETABLE SPECIALIST  
 TO EASTERN COLLEGE**  
 J. R. Hepler, in charge of classes in  
 vegetable gardening and greenhouse  
 work at the University of Wisconsin  
 for the past six years, has resigned to  
 accept the position of assistant pro-  
 fessor of horticulture at the New  
 Hampshire Agricultural college, at  
 Durham. Mr. Hepler, who is a gradu-  
 ate of the Pennsylvania State Col-  
 lege of Agriculture and an experi-  
 enced truck grower, has quite well  
 fenced truck growing, where he has  
 known for many years, and has  
 been in charge of extension demon-  
 stration work at farmers' institutes and schools, in  
 addition to his instruction work at  
 the College of Agriculture.

**WILL CORN MATURE?**  
 If present crop conditions are any  
 criterion, only good growing weather  
 in July and August, accompanied by  
 abundant rainfall, will insure a suc-  
 cessful corn crop. The corn crop  
 of the north. Spring rains and  
 have promise excellent crops, but  
 though corn has come well with  
 it has made but small growth and  
 June has continued cold and back-  
 ward. This combined with the fact  
 that much of the corn has either  
 not been planted or was planted after  
 June 15th, would indicate the very  
 reasonable expectation of the neces-  
 sity of harvesting an immature corn  
 crop.

With this outlook the live stock  
 farmer without a silo, or without suf-  
 ficient silage capacity, is in poor con-  
 dition. Without silage, the milk and  
 beef production next winter. The silo  
 appeals economy for the best of corn  
 crops, but it is an absolute necessity  
 if reasonable returns are to be ex-  
 pected from the corn crop.

One man has said: “There ought to  
 be a million silos built and filled  
 before the growing season is over.  
 They will not only help to win the  
 war, but to make living cheaper after  
 the war.” Yes, we need more, many  
 more silos. We need them to feed  
 our dairy cows to the best advantage  
 and to secure maximum returns. This  
 year, if never before, a silo will more  
 than pay for itself in a year. The  
 next two months the farm slogan  
 should be “Build a silo.” To some  
 extent, it is essentially good judg-  
 ment and sound business foresight  
 dictated by intelligent self interest.

The desire for a silo has entered  
 the minds of many farmers, but he has  
 neglected to translate that desire in-  
 to action. Don't put off until too  
 late, until the necessity of a silo is  
 demonstrated. It is to be hoped the corn crop  
 will mature; but even should our  
 hope be realized, the silo will be a  
 good investment. The successful  
 farmer considers and acts. The unsuc-  
 cessful man merely considers.—Re-  
 print of editorial in Hoard's Dairy-  
 man of July 6, 1917.

**THE JOURNAL CUP**  
 More people than ever before will  
 be interested in the Wisconsin State  
 fair in 1917. One of the main de-  
 partments—that of farming and the  
 like, will be larger, too, than ever be-  
 fore. The condition of war existing  
 between this country and Germany  
 has made the necessity of raising  
 foodstuffs greater than ever. There  
 is scarcely a farmer in the state of  
 Wisconsin that will not have double  
 the crop of former years and the  
 crop of former years several kinds of  
 vegetables he has not before culti-  
 vated.

**REAL DANGER**  
 Shoo—Do you really believe that  
 Kissing is dangerous?  
 Ho—Well—er—I believe it some-  
 times results in a breach of promise  
 suit.

**REAL THING**  
 Guest—Waiter, I see you have  
 turtle soup on the menu. Is it mock  
 turtle?  
 No, sah; jis' plain ebery-  
 day mud turtle, sah.

# EVERY ITEM NEWS FOR SOMEBODY

Community Events of the Past Week from Various Parts of the County

## ALTON

At the school meeting Monday evening Wm. Peters was re-elected treasurer. It was voted to begin the eighth month school, to begin the first Monday in October.

Mrs. Anna Kindert who has been visiting her mother, Mrs. Gaseh, and other relatives for several weeks, departed for her home Monday.

John Withelm, Adam Kindert, C. Huser and C. L. Lett attended the Crossroad auction sale last week, in the town of Sigel.

## BIRON

Pay your debt.

Mr. and Mrs. Percy Kempfort are the proud parents of a baby boy, born June 21, 1917.

Mrs. Frank Sweet from Racine visited Mrs. Carlson Sunday.

Lloyd Barton left Monday for Milwaukee where he will visit friends for some time.

The Biron Parks played with the Nevers-Sweats Sunday, winning by a score of 18 to 2.

Mrs. Bart Gaffney visited friends in Mauston last week.

Mr. and Mrs. W. O. Barton attended a surprise party on Mrs. John Onholt Friday evening, the occasion being her 63rd birthday.

Miss Harriet Barton visited her parents one day last week.

Born, to Mr. and Mrs. Harry Gilman on Friday, June 29, 1917, a daughter.

There will be a big barn dance at the Frank Young place on Sunday evening, July 8. All are cordially invited to attend and have the best time of your life. Good music.

Lawrence Domach, a former resident here, but who is now living at Amherst Junction, was married on Monday to Helen Sildzicki of the town of Hovon. The wedding was a big affair, followed by a big dance in the opera house at Amherst Junction. They will reside at Amherst where Mr. Domach owns a garage.

A Saeger has purchased a new Buick Six.

## ALONG THE SENECA ROAD

F. W. Jones has sold out his milk route to Wood Co., giving up the work July 1st. Mr. Jones thinks after over two years of service in that line he is entitled to a rest. He will take his milk to the cheese factory at Seneca Corners. P. Peterson and D. M. Smith will also patronize the factory as a result of the change.

Myrtle Graham of Chicago called at the R. P. Viland home one day last week.

Strawberry picking is in order at the Robinson place and they report the crop unusually fine.

Charlotte Viland spent a few days with her friend Edna Ostermeyer last week.

W. M. Jackson, Will Teske, J. R. Merriam and F. W. Jones are laying the stone for the new concrete road.

Wm. Sporka has the excavating and stone work nearly finished for the new house which is to be built on his farm this summer.

The annual school meeting for the Jackson district was held Monday evening. The usual business was transacted and the applications of teachers considered. There were three applicants for the position but no selection was made, the matter being left to the judgment of the school board. Mrs. F. W. Jones was elected clerk to succeed H. P. Viland.

Mat Peterson returned last week from Rochester, Minnesota, where he has been for some time taking treatment in the Mayo Bros. hospital. His friends will be glad to hear that his health is much improved.

## EAST NEW HOME

Mr. and Mrs. Ed Holtz were visitors in Grand Rapids Friday.

Mrs. Roy Potts and Miss Gladys Potts were afternoon visitors at the J. S. Irwin home on Friday.

Leslie and Mabel Holtz were Plainfield visitors on Wednesday of last week.

Mr. and Mrs. Robt. Reid and family spent Sunday at Big Falls.

Eva, Lulu and Louis Irwin spent Sunday at the Fred Irwin home.

Mrs. Ed Holtz and son Leslie visited at the August Saeger home near Keilner Sunday.

Mr. and Mrs. W. G. Lord spent Sunday at the Corbitts home.

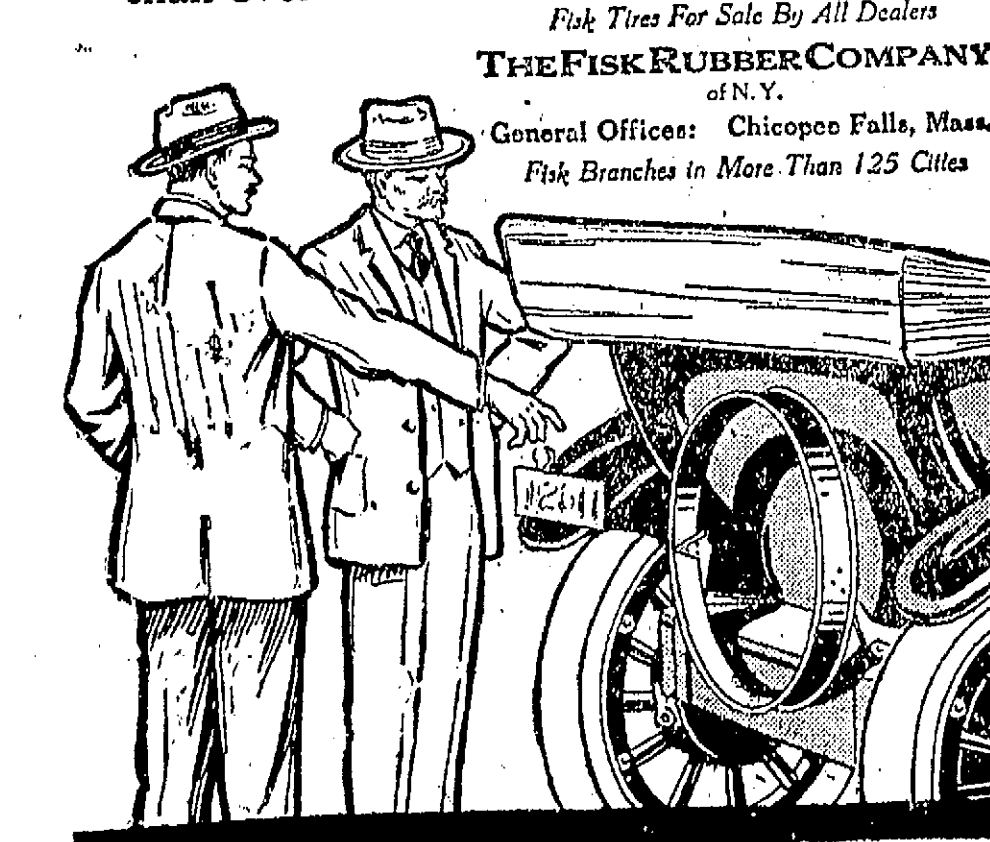

The Misses Lela Irwin and Mabel Holtz were afternoon visitors at the Pierson home Sunday.

Leslie and Mabel Holtz and Edwin and Ellen Pierson spent Sunday evening at the Reid home.

Mrs. Elbe Corbitt and children spent Wednesday afternoon of last week at the W. G. Lord home.

## Start Now To Make Your Tire Equipment FISK

BEGIN NOW by getting a Fisk for your spare rim. Thousands of today's users of complete Fisk equipment began years ago with the purchase of a single tire. Experience proved to them that the famous Fisk Non-Skid is the greatest dollar-for-dollar tire value on the market—and the standard of Fisk Quality is higher today than ever.

Fisk Tires For Sale By All Dealers  
THE FISK RUBBER COMPANY  
General Offices: Chicago Falls, Mass.  
Fisk Branches in More Than 125 Cities

Dunnebecke, Manager, Bayfield Investment Association, Ashland, Wisconsin. Building: Ashland Bank and Trust Building. E. N. Pomoinville, local agent. 26t

## NEWS NOTES FROM WISCONSIN PLACES

Will Make Potash.—The Mohr Lumber company are erecting a building along the C. M. & St. P. right of way in this city where they will start the manufacture of potash. The firm has decided upon this venture because of the prevailing high prices of this chemical which prior to the war was largely obtained from Germany. Now that the supply has been shut off we have been forced to the manufacture of the commodity ourselves in the face of exorbitant prices. The process of manufacture, while not complicated, is quite a long one and is dependent solely upon the amount of wood ashes that can be secured. The Mohr Lumber company derive their power from the waste slabs of wood and saw dust which is also burned. This makes a large quantity of wood ashes which are to be used in the manufacture of the potash. The ashes are contained in a large vat thru which water is percolated, just like grandmother used to do when she made soft soap. The liquid water is then boiled down, the solids collected from this process be-

ing potash in the raw state. It is necessary to use ten tons of ashes to secure one barrel of potash. Similar plants are now in operation in neighboring cities where there are large lumbering mills.—Tonahawk Leader.

Saloon Men Lost.—New Lisbon saloon keepers attempted to set aside the license election of that city which went dry last spring by a score of more votes. The grounds for their action were taken upon the claim that notice of the election was not properly published and posted, and that the returns of the election were not properly canvassed. The case came up for hearing before Circuit Judge E. Ray Stevens of Madison, Senator Frank Hanson looking after the saloon keepers case. The drys won, however, and after July 1 New Lisbon third parties will close their doors for a year at least.—Necedah Republican.

Illegal Hunters Fined.—A fine of two hundred dollars and costs or 90 days in jail was the sentence handed out to Edward Baxter, a Monticello woodsman, by Judge Charles F. Smith in municipal court Tuesday when Baxter pleaded guilty to three charges; hunting deer out of season, killing a doe and killing a fawn. The complaint against Baxter was made by S. J. Gwidt, conservation warden, who also caused the man's arrest, assisted by Warden H. W. McKenzie. Baxter was caught with the goods by the warden. In sentencing Baxter the judge, saying he regretted that he was unable to send him to the state prison.—Rhinelander New North.

Pearl Button Works.—The Fremont Pearl Button Works has a building erected, has machinery ordered and soon to be installed for the manufacture of pearl buttons from the shells that are daily being taken from the rich beds of clam shells along Wolf river. The incorporators are George H. Dobbins, John Stelger, Charles Pitt and Dr. Grana, all of Fremont. This corporation has been organized but could not do anything as yet in before they could be manufactured at the new factory. In two days last week shipments amounting to \$4,000 were made from the Fremont station. At least twenty expert workmen will be required at the turn of the first wheel in the new factory and it is expected that forty machines will be installed within a few months. This means an increase of many families in the population of Fremont as both clam gatherers, and expert workmen are likely to be attracted to the town by this new industry.

Houses are in great demand already and it is likely that this demand will increase as the industry progresses. Mr. Dobbins has disposed of his stock of general merchandise so as to give more of his attention to the manufacture of the button works.—Waupaca Post.

Killed by Lightning.—Richard Walsh, town clerk of the town of Stockbridge was instantly killed by lightning early Saturday morning, June 28. At the time of his death Mr. Walsh was going after the cows and was in a small orchard about eight rods from the house. Neighbors heard the crash of thunder which followed the lightning and looking out saw smoke coming from the field. They investigated the cause of the smoke and found the body of Mr. Walsh. A physician was summoned but could not do anything as Mr. Walsh was dead. The body was discovered by Simon Wettstein and a hired man. Mr. Wettstein and the doctor carried the body to the house. Mr. Walsh was buried about the head face and down the front of the body. He leaves to mourn his untimely death, his wife, six children, his mother, five sisters and three brothers. The oldest child is seven years old and the youngest is two weeks old.—Chilton Journal.

Now that they have gotten to demonstrating obstetrics and prenatal influence in the movie films, there isn't much left for the girl to blush over. And by the way, why hasn't some enterprising film company grabbed the rights to produce 'Anomalies of Sex and the works of Have Ellis'?

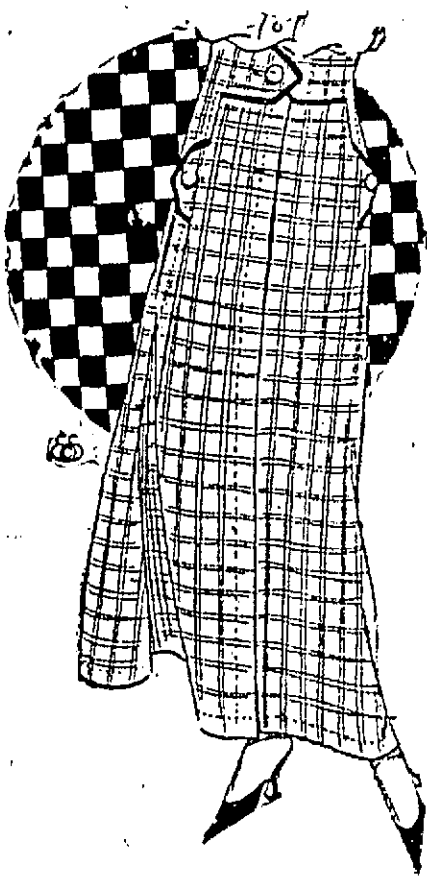

SILO FOR CHICKENS THE LATEST The theory of the silo for chickens, so that they may be fed food in winter which will increase their egg laying is being urged generally by the expert poultrymen who have experiments in silage, and promises to bring about an evolution in the industry. So much interest has been taken that the lumber industry has taken up the problem in an effort to develop a simply built wooden chicken silo which will be as much of a success in the poultry industry as the wooden silo has become in the dairy branch of the agricultural field. The Northern Hemlock and Hardwood Manufacturers association which made a special study of the dairy silo is especially interested in the new chicken silo.

## Vacation Footwear

No doubt you are planning on going somewhere for a week or two for your summer vacation. While making your plans be sure to remember that you will surely need one or more pairs of shoes. We would suggest—White Shoes—and of course Pumps in both Black and White.

# FAMOUS AMERICAN FLAGS

FLAG MADE ACCORDING TO ACT OF CONGRESS

Starry emblem of our country rich in history and honor: And the grand old banner will soon be making more history and receiving greater honor on the battlefields of Northern France and Belgium

TOUGH as yet the baby of nations, Uncle Sam has many flags of which he has reason to be proud. Most of them are in the possession of the government, but a few are owned by individuals or army posts.

One of them, now kept at the state-house at Annapolis, Md., was carried by the Maryland troops during the war of the American Revolution, and is made in accordance with the act of congress, June 14, 1777. It is now positively known to have been the original flag of the "Third Maryland" regiment, commanded by Col. John Rogers, at the battle of Cowpens, S. C., in January, 1778, in which fight it was held by William Bacheor. Bacheor was sent home to Baltimore wounded and took his flag with him.

After Bacheor's death in March, 1781, the flag remained in his family, and when the British invaded Maryland in 1814, this same flag was carried by William Bacheor's son, in the battle of North Point, as a banner for the Twenty-seventh Maryland regiment. This William Bacheor died in 1885, and the flag, in 1907, was presented to the state of Maryland and has since then resided in its capital building at Annapolis.

Another famous banner is the battle flag of Commander Oliver Hazard Perry, the flag which he successfully carried through the battle of Lake Erie, September, 1813. This flag had been made at Perry's express, but at the suggestion of Porter Hamilton, he added the words "Don't give up the ship," the last uttered by Perry, but one in fact, an adoption of Lawrence's words. Lawrence, killed in the fight in June, 1813, between the English and American forces. These words have been variously attributed to Perry, but one in fact, an adoption of Lawrence's words. Lawrence, killed in the fight in June, 1813, between the English and American forces. These words have been variously attributed to Perry, but one in fact, an adoption of Lawrence's words.

A British Trophy. In the same chamber at the academy is a foreign royal British standard which was captured from the parliament house during the capture of Canada, Feb. 1813, by American forces. It is a Canada flag, with five quarters, and is an excellent example of the heraldic blazoning which was used in the time of George III. In one corner is a red lion passant guardant, and in another is the golden harp of Ireland. The flag is a red lion passant guardant, and in another is the golden harp of Ireland. The flag is a red lion passant guardant, and in another is the golden harp of Ireland.

In the National museum in Washington is the Star Spangled Banner, the same flag which floated over Fort Mifflin in September, 1814, when it was attacked by the British, and the one which Key wrote his immortal poem. Around which Key wrote his immortal poem. Around which Key wrote his immortal poem. Around which Key wrote his immortal poem.

Mexican trophies are to be seen at the Naval academy. These flags are all unique in design, and are all unique in design. These flags are all unique in design, and are all unique in design. These flags are all unique in design, and are all unique in design.

In the anti-chamber to the rooms of the secretary of war, in Washington, is the famous flag which flew over Fort Sumter in April, 1861, when it was fired on by the Confederate batteries. This was the shot which opened the great war between the states.

The flag of the Merrimack is now owned by the family of the late Capt. Beverly Littlepage, formerly of Washington. This flag is in the possession of the Merrimack in the possession of the Merrimack.

FIRST U.S. FLAG TO BE RAISED IN CUBA

tion of Mr. C. F. Gunther of Chicago; this was the first one raised, but was shot away. The flag first by the Lilliputians is the second one run up.

Regan's Flag. In the rooms of the Stevenson Post at Roxbury, Mass., is preserved one of the strangest banners in the world has ever seen. It is a tobacco factory in Richmond, in Civil War times, many Federal soldiers were prisoners, among them a Timothy J. Regan. Regan conceived the idea of making a flag.

A dannel shirt made the blue ground, a shirt of white cotton furnished the white stars, and the white were bought furnished to make the red and white stripes. In hiding, they worked at their task till at last it was finished. It was thrown to the wind at the camp. It was thrown to the wind at the camp. It was thrown to the wind at the camp.

The flag of the Maine, the ship whose sinking precipitated the Spanish-American war in 1898, is kept at Annapolis. Near by the banners captured by Perry, now lies for safekeeping in the vaults of E. Peary, now lies for safekeeping in the vaults of E. Peary.

The banner which floated over the North pole, raised there April 6, 1909, by Commander Robert E. Peary, now lies for safekeeping in the vaults of E. Peary, now lies for safekeeping in the vaults of E. Peary.

The banner which floated over the North pole, raised there April 6, 1909, by Commander Robert E. Peary, now lies for safekeeping in the vaults of E. Peary, now lies for safekeeping in the vaults of E. Peary.

Oldest Flag in Museum. The oldest flag in the National museum, at Washington, is the first United States flag of which there is authentic record. This is the banner of John Paul Jones. On the very day the law was enacted establishing a national flag for the United States of America, June 4, 1777, congress appointed John Paul Jones to be commander of the Ranger. History does not relate, with the authority, the exact date of the making of the flag, but it must have been very soon after the congressional act.

Later, Paul Jones set sail on his famous high above the Bon Homme. The most notable of the ships of the new country. The most notable of the ships of the new country. The most notable of the ships of the new country.

THE FAMOUS "STARRY FLAG" OF JOHN PAUL JONES

first American flag that came into existence after the enactment of congress. As evidence of the theory they point to the 12 stars instead of 13. Had this flag had an official predecessor the mistake in the number of stars would hardly have occurred.

This historic standard, kept intact by long and loving care, shows its age in much-frayed edges and worn patches. The 12 stars, arranged in three parallel perpendicular rows, still stand out the stanchly on their unstable foundation of the blue field and the 13 red and white stripes have grown pathetically threadbare.

The National museum contains a collection of remnants of flags that participated in naval engagements from the time of the Revolutionary war to the war with Mexico; also those of foreign vessels of war captured by the navy during those periods. This display of fragments is quite interesting. It was collected by Peter J. B. Widener, and presented by him to the library of the National museum, which transferred it to the National museum.

Among these remnants is a piece of the British flag of La Guerriere, used during the battle of the Constitution, and of the Java, worsted by the same indomitable American, as well as a fragment of the flag of the Algerine brig Zouma, captured under Decatur.

A division of the museum's flag collection relates to the Civil war, and the most interesting is that of the Star Spangled Banner. This flag was captured at Fort Mifflin, South Carolina, when Maj. Robert Anderson, First United States artillery, moved his forces to Fort Sumter. The flag was secured by the Union forces. The flag was secured by the Union forces.

The flag of the Maine, the ship whose sinking precipitated the Spanish-American war in 1898, is kept at Annapolis. Near by the banners captured by Perry, now lies for safekeeping in the vaults of E. Peary, now lies for safekeeping in the vaults of E. Peary.

The banner which floated over the North pole, raised there April 6, 1909, by Commander Robert E. Peary, now lies for safekeeping in the vaults of E. Peary, now lies for safekeeping in the vaults of E. Peary.

The banner which floated over the North pole, raised there April 6, 1909, by Commander Robert E. Peary, now lies for safekeeping in the vaults of E. Peary, now lies for safekeeping in the vaults of E. Peary.

The flag of the Merrimack is now owned by the family of the late Capt. Beverly Littlepage, formerly of Washington. This flag is in the possession of the Merrimack in the possession of the Merrimack.

## Rapid Evaporation of Water Secret of Success of The Iceless Refrigerator

Milk and other perishable foods can be kept cool and preserved for considerable periods, even where ice is unobtainable. This can be accomplished by the use of iceless refrigerators, which are dependent on the rapid evaporation of water for the creation of low temperatures. These devices have been perfected by woman demonstrators in extension work, South, of the United States department of agriculture.

The iceless refrigerator consists of a wooden frame covered with cotton

An Iceless Refrigerator.

flannel, burlap or heavy duck. It is desirable that the frame be screened, although this is not necessary. Wicks, made of the same material as the covering, resting in a pan of water on top of the cooler, conduct the water over the sides and ends of the pan and allow it to seep down the sides of the box. The evaporation from this moistened covering causes a lower

temperature inside. On dry, hot days a temperature of 50 degrees has been known to be obtained in the cooler. This is the way to build it:

Make a screened case 3 1/2 feet high with the other dimensions 12 by 15 inches. If a solid top on this. Other place the water pan closely into the lining of the top frame and support it by one-inch cleats fastened to the inside of the frame. Place two movable shelves in the frame, 12 by 15 inches apart. Use a biscuit pan, 12 by 14 inches on the top to hold the water, and where the water can be added without need to have the whole thing standing in a large pan to catch any drip. The pans and case may be painted white, allowed to dry, and then enameled. A covering of white cotton flannel should be smooth to fit the frame. Have the smooth side out and button the covering on the frame with buggy or automobile curtain hooks and eyes arranged so that the door may be opened without unfastening these hooks. This can easily be done by putting one row of hooks on the edge of the door near the latch and the other just opposite the opening, with the hem on each side extending far enough to cover the crack at the edge of the door, so as to keep out the warm, outside air and retain the cooled air. This dress or covering will have to be hooked around the top edge also. Two double strips one-half the width of each side should be sewed on the top of each side covering, and allowed to extend over about 2 1/2 or 3 inches in the pan of water. The bottom of the covering should extend into the lower pan.

Place the refrigerator in a shady place, where air will circulate around it freely. If buttons and buttonholes are used on the cotton flannel instead of buggy hooks, the cost will be reduced.

Periodic Brilliance is not Success. The Great man is simply the Small man become great. Every Great man at some time or other is the unknown, obscure man. Make your life count by compelling every single effort to figure in the great sunning up. For a Success itself is nothing more nor less than work well performed and Followed Up day after day, year after year.

## NEWS NOTES FROM WISCONSIN PLACES

**Will Make Potash.**—The Mohr Lumber company are erecting a building along the O. M. & St. P. right of way in this city where they will start the manufacture of potash. The firm has decided upon this venture because of the prevailing high prices of this chemical which prior to the war was largely obtained from Germany. Now that the supply has been shut off we have been forced to the manufacture of the commodity ourselves in the face of exorbitant prices. The process of manufacture, while not complicated, is quite a long one and is dependent solely upon the amount of wood ashes that can be secured. The Mohr Lumber company have their power from the waste slabs of wood and saw dust which is also burned. This makes a large quantity of wood ashes which are to be used in the manufacture of the potash. The ashes are contained in a large vat thru which water is percolated just like made soft soap. The slabs of wood are then boiled down, the solids collected from this process be-

ing potash in the raw state. It is necessary to use ten tons of ashes to secure one barrel of potash. Similar plants are now in operation in neighboring cities where there are large lumbering mills. —Tomahawk Leader.

**Saloon Men Lost.**—New Lisbon saloon keepers attempted to set aside the license election of that city which went dry last spring by a score or more of votes. The grounds for their action were taken upon the claim that notice of the election was not properly published and posted, and that the returns of the election were not properly canvassed. The case came up for hearing before Circuit Judge E. Ray Stevens of Madison, Senator Frank Hanson looking after the saloon keepers case. The dry law, however, and after July 1 New Lisbon (first parlor) will close their doors for a year at least. —Nesadah Republican.

**Illegal Dollars Fined.**—A fine of two hundred dollars and costs or 90 days in jail was the sentence handed out to Edward Baxter, a Monticello Woodman, by Judge Charles F. Smith in municipal court Tuesday when Baxter pleaded guilty to three charges; hunting deer out of season, killing a doe and killing a fawn. The killing a doe and killing a fawn, the complaint against Baxter was made by S. J. Gwidt, conservation warden, who also caused the man's arrest, assisted by Warden H. W. McKenzie. Baxter was caught with the goods by the warden. In sentencing Baxter Judge Smith severely reprimanded him, saying he regretted that he was unable to send him to the state prison. —Rhinelander New North.

**Pearl Button Works.**—The Fremont Pearl Button Works has a building erected, has machinery ordered and soon to be installed for the manufacture of pearl buttons from the shells that are daily being taken from the rich beds of clam shells along Wolf river. The incorporators are George H. Dobbins, John Steiger, Charles Pitt and Dr. Greina, all of Fremont. This corporation has been organized to ship some shells that have come in before they could be manufactured at the new factory. In two days last week shipments amounting to \$4,000 were made from the Fremont station. At least twenty expert workmen will be required at the turn of the first wheel in the new factory and it is expected that forty machines will be installed within a few months. This means an increase of many families in the population of Fremont as both clam gatherers, and expert workmen are likely to be attracted to the town by this new industry. Houses are in great demand already and it is likely that this demand will increase as the industry progresses. Mr. Dobbins has disposed of his stock of general merchandise so as to give more of his attention to the management of the button works. —Waupaca Post.

**Killed by Lightning.**—Richard Walsh, town clerk of the town of Stockbridge was instantly killed by lightning early Saturday morning, June 23. At the time of his death Mr. Walsh was going after the cows and was in a small orchard about eight rods from the house. Neighbors heard the lightning and looking out saw smoke coming from the field. They investigated the cause of the smoke and found the body of Mr. Walsh. A physician was summoned, but could not do anything as Mr. Walsh was dead. The body was discovered by Simon Weitsch and a hired man. Mr. Weitsch and the doctor carried the body to the house. Mr. Walsh was burned about the head, face and down the front of the body. He leaves to mourn his untimely death, his wife, six children, his mother, five sisters and three brothers. The oldest child is seven years old and the youngest is two weeks old. —Chilton Journal.

### ALPINE

At the school meeting Monday evening Wm. Peters was re-elected treasurer. It was voted to have the eighth month school to begin the first Monday in October.

Mrs. Amanda Kunderi who has been visiting her mother, Mrs. Gaseh, and other relatives for several weeks, departed for her home Monday.

Johanna Wilhelm, Adam Kunderi, C. Huser and O. J. Teu attended the Grosland auction sale last week, in the town of Sigel.

## NEWS NOTES FROM WISCONSIN PLACES

### Will Make Potash.

The Mohr Lumber company are erecting a building along the C. M. & St. P. right of way in this city where they will start the manufacture of potash. The firm has decided upon this venture because of the prevailing high prices of this chemical which prior to the war was largely obtained from Germany. Now that the supply has been shut off we have been forced to the manufacture of the commodity ourselves in the face of exorbitant prices. The process of manufacture, while not complicated, is quite a long one and is dependent solely upon the amount of wood ashes that can be secured. The Mohr Lumber company derive their power from the waste slabs of wood and saw dust which is also burned. This makes a large quantity of wood ashes which are to be used in the manufacture of potash. The ashes are contained in a large vat thru which water is poured, just like grandmother used to do when she made soft soap. The lye water is then boiled down, the solids collected from this process being

Saloon Men Lost.—New Lisbon saloon keepers attempted to set aside the license election of that city which went dry last spring by a score or more of votes. The grounds for their action were taken upon the claim that notice of the election was not properly published and posted, and the returns of the election were not properly canvassed. The case came up for hearing before Circuit Judge E. Ray Stevens of Madison, Senator Frank Hanson looking after the saloon keepers case. The drys won, however, and after July 1 New Lisbon thirst parlor will close their doors for a year at least.—Necedah Republican.

Illegal Hunters Fined.—A fine of two hundred dollars and costs or 90 days in jail was the sentence handed out to Edward Baxter, a Menomonie Woodsman, by Judge Charles F. Smith in municipal court Tuesday when Baxter pleaded guilty to three charges; hunting deer out of season, killing a doe and killing a fawn. The complaint against Baxter was made

by S. J. Gwidt, conservation warden, who also caused the man's arrest, assisted by Warden H. W. McKenzie. Baxter was caught with the goods by the warden. In sentencing Baxter Judge Smith severely reprimanded him, saying he regretted that he was unable to send him to the state prison.—Rhinelander New North.

Pearl Button Works.—The Fremont Pearl Button Works has a building erected, has machinery ordered and soon to be installed for the manufacture of pearl buttons from the shells that are daily being taken from the rich beds of clam shells along Wolf river. The incorporators are George H. Dobbins, John Steiger, Charles Pitt and Dr. Greina, all of Fremont. This corporation has been obliged to ship some shells that have come in before they could be manufactured in the new factory. In two days last week shipments amounting to \$4,000 were made from the Fremont station. At least twenty expert workmen will be required at the turn of the first wheel in the new factory and it is expected that forty machines will be installed within a few months. This means an increase of many families in the population of Fremont as both clam gatherers and expert workmen are likely to be attracted to

the town by this new industry. Houses are in great demand already and it is likely that this demand will increase as the industry progresses. Mr. Dobbins has disposed of his stock of general merchandise so as to give more of his attention to the management of the button works.—Waupaca Post.

Killed by Lightning.—Richard Walsh, town clerk of the town of Stockbridge was instantly killed by a lightning early Saturday morning, June 23. At the time of his death Mr. Walsh was going after the cows and was in a small orchard about eight rods from the house. Neighbors heard the crash of thunder which followed the lightning and looking out saw smoke coming from the field. They investigated the cause of the smoke and found the body of Mr. Walsh. A physician was summoned but could not do anything as Mr. Walsh was dead. The body was discovered by Simon Wetstein and a hired man. Mr. Wetstein and the doctor carried the body to the house. Mr. Walsh was burned about the head, face and down the front of the body. He leaves to mourn his untimely death, his wife, six children, his mother, five sisters and three brothers. The oldest child is seven years old and the youngest is two weeks old.—Chilton Journal.

Now that they have gotten to demonstrating obstacles and proving metal ingenuity in the movie films, there isn't much left for the girl to do but to make a picture. And by the way, why hasn't some enterprising film company grabbed the rights to produce anomalies of sex and the works of old—Chilton Journal.

SILO FOR CHICKENS THE LATEST. The theory of the silo for chickens, so that they may be fed food in winter which will increase their egg laying is being urged generally by the expert poultrymen who have experiments in silage, and promises to bring about an evolution in the industry. So much interest has been taken that the lumber industry has taken up the problem in an effort to develop a simply built wooden chicken silo which will be as much of a success in the poultry industry as the wooden silo has become in the dairy industry. Northern Haverhill and Hardwood Manufacturers association which is especially interested in the new chicken silo. The lumbermen are planning to develop a practical silo and to have it ready for demonstration and use the coming summer in preparation for the winter sale market.
